As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the “BagBag” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 2.

Synposis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The BagBag website is a store that brings every bags in the world to you such as historic monuments information natural knowledge or skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Problem Definition

BagBag is an online store for various types of Bags. They have collection of bags. Now they want to revamp their website with all the products listed on the website. Consumers should find it easy to view various products and decide upon purchasing the right product to meet their requirements.

A website needs to be designed to display various bags available with the store. Details of locations, feedback must be included.

Requirement Specification:

The Web site is to be created based on the following requirements.

1. The Home Page should be created making use of Sections with a suitable logo, the header section can be added which will show images of various Bags.
2. The site must contain the links to navigate through various types of Bags, BackPacks etc.
3. Site should have different section for Men and Women and bags should be placed accordingly.
4. Links of bags must be categorized like (Bags, Sling Bags, BackPacks etc.)
5. Specification and Pricing of Bags should be added along with the images.
6. Website should provide section for various brands offered in the store.
7. Gallery section should be added for viewing different images.
8. Feedback must be allowed to enter by the viewer
9. Site map, Gallery, about us, Queries link, Contact us link must be added.
10. The complete description must be allowed to get download as pdf or doc file.
11. The advertise section with various facilities provided should be mentioned.

Customer Requirements Specifications

User:

Input:

- Member registration data
- User-selected bag data
- Feedback to admin

Process:

- Search bag information
- Search the products of the bag
- Check member registration information
- Check feedback

Output:

- Notification of successful registration failed
- Information about the selected product
- Information where to put the bag, how to buy the bag and pay
- Failed success feedback message

Webmaster:

Input:

- Login data
- Product data to be created/updated/deleted
- Response data to create/update/delete
- Respond to member feedback

Process:

- Create/Update/Delete product information
- Create/Update/Delete member information
- Delete feedback
- Remove member

Output:

- Notification of login success/failure
- Notification Create/Update/Delete success/failure

Hardware / software requirement:

Software:

- Notepad/HTML editor/CoffeeCup
- Angular / Angular JS / React / BootStrap
- Dreamweaver / Figma
- MS IE / Chrome / FireFox / Netscape /MS Edge

Hardware:

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?
